

# PAYFORT APP GUIDELINES

## PRE-REQUISITE

Before installing the app to your store please ensure following:

- 1) You have Payfort Merchant Account.
- 2) In your merchant account, you have enabled Redirection channel for your desired currency (if not please contact Payfort support).
- 3) In your merchant account, ensure SADAD is enabled in your desired currency.
- 4) In your merchant account, ensure MADA is enabled in your desired currency.

If you have setup all above, you are all set for making a flawless Payfort payment integration for your store.

## GETTING STARTED

After ensuring all the pre-requisite, you need to make these **must have configurations** to your merchant account:

- 1) Login into your merchant store and navigate to Integration Settings -> Security Settings and ensure you have your request and response phrase setup, need not to be same. Please keep the SHA Type as directed in the image below:

The image shows a form for configuring security settings. It includes fields for Merchant Identifier, Access Code (with a Generate button), SHA Type (set to SHA-256), SHA Request Phrase, SHA Response Phrase, Origin IP, and Origin URL. The SHA Request and Response Phrase fields have eye icons to toggle visibility.

- 2) Next, navigate to Integration Settings -> Technical Settings click on Redirection

- 3) Inside redirection channel please setup the Redirection URL, Direct Transaction Feedback and Notification URL to [https://payfort.samywebtechnologies.com/orders\\_response](https://payfort.samywebtechnologies.com/orders_response)

Redirection URL * ?	<input type="text" value="https://payfort.samywebtechnologies.com/orders_response"/>
Direct Transaction Feedback * ?	<input type="text" value="https://payfort.samywebtechnologies.com/orders_response"/>
Notification URL * ?	<input type="text" value="https://payfort.samywebtechnologies.com/orders_response"/>

**NOW WE ARE ALL SET, LETS INSTALL THE APP**

While installing the app you will be asked for

- 1) Access Code
- 2) Merchant Identifier
- 3) Security Request Phrase

These three settings can be found under your merchant account in

Integration Settings -> Security Settings
